ALICE ROBERTSON CHEMICAL HYGIENE PLAN

INTRODUCTION

This document describes the Chemical Hygiene Plan for Muskogee Public Schools for the facility of Alice Robertson of 402 N. “S” street Muskogee, Okla. 74403 as required by OSHA’s Occupational Exposure to Hazardous Chemicals in Laboratories Standard. 29CFR1910.1450.

In order to comply with the Standard, Muskogee Public Schools facility of Alice Robertson has established a plan to ensure our workplace is capable of protecting employees from Health Hazards associated with Hazardous Chemicals in the laboratory, and capable of keeping exposures below the Permissible Exposure Limits (PEL) specified in 29CFR1910 Subpart Z. Questions regarding this plan should be directed to Debra Kinman who is the science department chairperson.

This plan is made readily available to the employees of Alice Robertson, employee representatives & upon request by the Assistant Secretary for the Occupational Safety & Health Administration.

A review and evaluation of this program is conducted on an annual basis and updated as necessary.

The person responsible for implementation of this plan is Debra Kinman and Peggy Jones the building principal. The assigned Chemical Hygiene Officer is Wayne Johnson. This facility has established a Chemical Hygiene Committee comprised of the following personnel:

- Wayne Johnson
- Debra Kinman
- Michele Hofschulte
- 
- 
- 

STANDARD OPERATING PROCEDURES

For laboratory work at Alice Robertson which involves the use of Hazardous Chemicals, standard operating procedures (SOP) have been addressed in order to reduce potential Safety and/or Health Hazards caused by such use. These procedures include various engineering control measures such as laboratory fume hoods, maintenance procedures for these engineering controls including testing proper function of such equipment, the
use of appropriate Personal Protective Equipment (PPE) and maintenance of such equipment.

The specific procedures implemented by Muskogee Public Schools for the facility of Alice Robertson of 402 N. “S” street Muskogee, Okla. 74403 are as follows:

[These are general procedures of laboratory operation which you likely already have in effect. Section E of Appendix A of 1910.1450 lists the following consideration:]

- Accident, spills
- Avoidance of routine exposure
- Choice of chemicals
- Eating, drinking, smoking, etc.
- Equipment and glassware
- Exiting
- Horseplay
- Personal housekeeping
- Personal protection
- Planning
- Unattended operations
- Use of hood
- Vigilance
- Waste disposal and storage
- Working alone

[Section F of Appendix A of 1910.1450 includes additional safety recommendations:]

- Corrosive agents
- Electrically powered laboratory apparatus
- Fire, explosions
- Low temperature procedures
- Pressurized and vacuum operations
- Compressed gases
- Chemical Storage

NOTE: SEE APPENDIX "A" OF THE STANDARD FOR ASSISTANCE
CRITERIA FOR USE OF CONTROL MEASURES TO REDUCE EMPLOYEE EXPOSURE TO HAZARDOUS CHEMICALS

Muskogee Public Schools facility of Alice Robertson makes an initial determination of employee's exposure to any substance regulated by an OSHA Standard (29CFR1910.1001 through 29CFR1910.1050) which requires monitoring if there is reason to believe exposure levels for substances routinely exceed the Action Level or in the absence of an Action Level, the Permissible Exposure Limit (PEL). If initial monitoring discloses employee exposure over the Action Level and/or Permissible Exposure Limit, exposure monitoring and cessation of monitoring shall be in accordance with the relevant OSHA Standard.

Muskogee Public Schools facility of Alice Robertson notifies employees of exposure monitoring results in writing either individually or by posting results in (Accessible Location) within fifteen (15) working days after receipt of monitoring results.

**Control Measures**

- The following operations shall be performed in **LABORATORY FUME HOODS**:

- The following operations shall be performed in **BIOLOGICAL SAFETY CABINETS**:

- The following operations shall be performed in **GLOVE BOXES**:

- Where the use of respirators is determined to be necessary to maintain exposure below permissible limits, appropriate respiratory protection shall be provided at **NO COST** to employees. Respirators shall be selected and used in accordance with the respiratory protection policy Muskogee Public Schools facility of Alice Robertson, and with the requirements in 29CFR1910.134. This policy and associated documentation is filed Alice Robertson for employee review.

- Appropriate protective apparel compatible with the required degree of protection for substances handles shall be used. Debra Kinman will advise employees on glove, gown, eye protection, barrier creams, etc. use. Permeability charts are available at Alice Robertson of 402 N. “S” street Muskogee, Okla. 74403.

- Employees will be instructed on the location and use of eye wash stations and safety showers. Debra Kinman is responsible for this instruction.
• Employees will be trained Debra Kinman on the use of fire extinguishers and other fire protection systems.

MAINTENANCE OF FUME HOODS AND OTHER PROTECTIVE EQUIPMENT

**FUME HOODS** will be inspected every once per months by Debra Kinman; adequacy of face velocity will be determined by smoke; reports of hood inspections are filed in science department for employee review.

**EYE WASH STATIONS** will be inspected every once per months by Debra Kinman for proper operation and date.

**SAFETY EYE WEAR STATIONS** will be inspected every once per months by Debra Kinman for proper operation and numbers.

EMPLOYEE INFORMATION & TRAINING REQUIREMENTS

Muskogee Public Schools provides employees with information and training on hazardous chemicals in their work area, at the time of initial assignment, and prior to assignments involving new exposure situations to ensure employees are apprized of the hazards of chemicals present in their work area. Initial information and training sessions for new employees are conducted by Debra Kinman.

**The following information is conveyed to employees:**

• The contents of the Occupational Exposure to Hazardous Chemicals in Laboratories Standard 29CFR1910.1450 and its appendices;

• The location and availability of the Chemical Hygiene Plan;

• The signs and symptoms associated with exposures to hazardous chemicals used in the laboratory;

• Information on OSHA permissible exposure limits (PELs) where they exist, and other recommended exposure limits; and

• Location and availability of known reference material on the hazards, safe handling, storage and disposal of hazardous chemicals found in the laboratory including, but not limited to, Material Safety Data Sheets (MSDS) received from chemical suppliers.

**In addition to above information, employees are trained on the following:**
• Methods & observations which may be used to detect the presence or release of a hazardous chemical in the work area (monitoring methods and devices, visual appearance and/or odor, etc.);

• The physical and health hazards of chemicals in laboratory work areas; and

• The measures to protect employees from these hazards, including:
  - Standard operating procedures
  - Work practices
  - Emergency procedures
  - Personal protective equipment
  - Details of the chemical hygiene plan.

The outline for the training material is located in science department.

Debra Kinman is responsible for developing the standard operating procedures (SOPs). Debra Kinman is responsible for the portion of training on standard operating procedures.

PRIOR APPROVAL FOR SPECIFIC LABORATORY OPERATIONS

Certain laboratory procedures which present a serious chemical hazard require prior approval by Debra Kinman before work can begin. For this facility, these procedures include:

• Work with select carcinogens;
• Work with reproductive hazards;
• Work with neurotoxins; and
• Work with acutely hazardous chemicals

The chemicals include:
• __________
• __________
• __________

(If the laboratory does not utilize these classes of chemicals, then include a sentence which states “Our laboratory does not at this time use any chemicals which are sufficiently hazardous to require prior approval before they are use”.)

ADDITIONAL PROTECTION FOR WORK WITH SELECT CARCINOGENS, REPRODUCTIVE TOXINS, AND CHEMICALS WITH HIGH ACUTE TOXICITY

When any of these chemicals are used, the following provisions shall be employed where appropriate:

• Establishment of a designated area;
• Use of containment devices such as fume hoods or glove boxes;
• Procedures for safe removal of contaminated waste; and
• Decontamination Procedures.

[Appendix A of the standard has detailed programs for working with these chemicals. If you are using them, refer to Appendix A as a guide for your detailed procedures.]

[Note that according to the standard, a SELECT CARCINOGEN means any substance which meets one of the following criteria: (i) it is regulated by OSHA as a carcinogen; or (ii) it is listed under the category, “known to be carcinogens”, in the Annual Report on Carcinogens published by the National Toxicology Program (NTP) (latest edition); or (iii) it is listed under Group 1 (“carcinogenic to humans”) by the International Agency for Research on Cancer Monographs (IARC) (latest editions); or (iv) it is listed in either Group 2A or 2B by IARC or under the category, “reasonably anticipated to be carcinogens” by NTP, ...]

MEDICAL PROGRAM

Muskogee Public Schools provides all employees who work with hazardous chemicals an opportunity to receive medical attention, including any follow-up examinations which the examining physician determines to be necessary, for the following circumstances:

• Whenever an employee develops signs or symptoms associated with a hazardous chemical to which the employee may have been exposed in the laboratory, the employee is provided an opportunity to receive an appropriate medical examination. The employee shall contact the Chemical Hygiene Officer to initiate the medical program.

• Where exposure monitoring reveals an exposure routinely above the action level, or in the absence of an action level above the Permissible Exposure Limit (PEL), for an OSHA regulated substance for which there are exposure monitoring and medical surveillance requirements. Medical Surveillance shall be established for the affected employee as prescribed by the particular OSHA Standard. (Medical Surveillance & Exposure requirements as per 29CFR1910.1001 through 29CFR1910.1052)

Currently our laboratory uses:
- (e.g., Benzene)
- (e.g., Formaldehyde)
- (List other substances covered)

• Whenever an event takes place in the work area such as a spill, leak, explosion or other occurrence resulting in the likelihood of a hazardous chemical exposure, the effected employee(s) is provided an opportunity for a medical consultation. This consultation is for the purpose of determining the need for a medical examination. An appropriate medical examination is provided as necessary.
All medical examinations and consultations are performed by or under direct supervision of a licensed physician, are provided at NO COST to employees without LOSS OF PAY and at a reasonable time and place.

**Information Provided to Healthcare Professional**

Debra Kinman will provide the physician the following information:

- The identity of hazardous chemical(s) to which the employee may have been exposed to;
- A description of the conditions under which the exposure occurred including quantitative exposure data, if available; and
- A description of the signs and symptoms of exposure the employee is experiencing, if any.

**Healthcare Professional's Written Opinion**

A written opinion from the examining physician for a medical examination or consultation which is required by the Standard is obtained. This opinion shall include:

- Any recommendation for further medical follow-up;
- The results of the medical examination and any associated tests;
- Any medical condition that may be revealed in the course of the examination which may place the employee at increased risk as a result of exposure to a hazardous chemical found in the workplace; and
- A statement that the employee has been informed by the physician of the results of the consultation or medical examination and any medical condition that may require further examination or treatment.

The written opinion shall not include any findings/diagnoses which is not related to an occupational exposure.

**HAZARD IDENTIFICATION**

With respect to labels and Material Safety Data Sheets (MSDS), Muskogee Schools assures labels on incoming containers of hazardous chemicals are not removed or defaced and Material Safety Data Sheets that are received with incoming shipments of hazardous chemicals are maintained and readily accessible to laboratory employees.

For chemical substances developed in the laboratory, the following procedures have been implemented for the following circumstances:
• For known composition for chemical substances produce exclusively for laboratory use which are determined to be hazardous, the appropriate training is provided;

• For unknown composition of chemicals produced as a by product, the substance is assumed to be hazardous and the appropriate standard procedures under Section (2) of this plan are implemented;

• For chemical substances produced for another user outside of the laboratory, Muskogee Schools complies with the Hazard Communication Standard 29CFR1910.1200, including the requirements of preparation of Material Safety Data Sheets and labeling.

EMERGENCY RESPONSE

[There are two additional OSHA standards which interface with the Chemical Hygiene Plan; 1910.38 Employee Emergency Plans and Fire Prevention Plans, and 1910.120(p) and (q) Hazardous Waste Operations and Emergency Response (developed in response to SARA Title III). Please review these standards and develop appropriate emergency procedures for your facility if your facility is covered by one of these standards.]

RECORDKEEPING

Muskogee Public Schools establishes and maintains for each employee an accurate record of any measurements taken to monitor employee exposure and any medical consultation and examinations including tests or written opinions as required by the Standard. These records are kept, transferred, and made available in accordance with 29CFR1910.20, Access to Employee Exposure and Medical Records.
